- In computing,  
position-independent code  
(PIC) or

position-independent  
executable (PIE) is a body  
of machine code that, being  
placed somewhere in the  
primary memory, executes  
properly regardless of its  
absolute address. PIC is  
commonly used for shared  
libraries, so that the same  
library code can be loaded  
in a location in each  
program address space  
where it will not overlap  
any other uses of ...
